

# Origami – Simple Swan

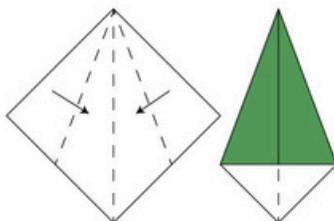

## Item Needed::

- 1 square sheet of paper

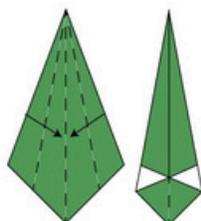

### Step 1: Create the center crease.

- Place the square like a diamond.
- Fold the left corner to the right corner, crease, and unfold.

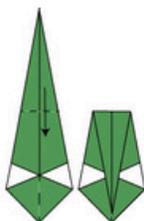

### Step 2: Make the kite fold.

- Fold the upper left edge to the center crease.
- Fold the upper right edge to the center crease to form a kite shape.

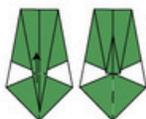

### Step 3: Narrow the shape.

- Flip the paper over.
- Fold the new outer edges to the center crease again to make a thinner kite.

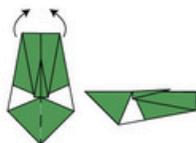

### Step 4: Form the neck.

- Fold the long top point down so the tip touches the bottom point.

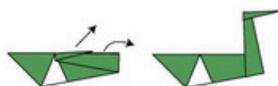

### Step 5: Form the head.

- Fold the very tip of that point back up a small amount to create the head.

### Step 6: Fold the body.

- Fold the entire model in half along the original center crease.

### Step 7: Shape the swan.

- Gently pull the neck upward away from the body.
- Pull the head slightly forward.
- Crease the base of the neck so the swan can stand.
